

# AIV Announces New Consolidated Facilities for AIV UK and ADANAC

The UK: AIV, L.P. is proud to announce the consolidation of facilities for AIV UK and ADANAC, a significant milestone for our group of companies, benefiting our customers, suppliers and employees. Currently in two separate facilities, AIV UK and ADANAC will share a custom built 50,000 sq ft facility in St. Edmunds, Suffolk, set to open early 2025.

This move will streamline our businesses to better serve our customers with time critical requirements for valves, actuation and modifications. "The new facility will provide significantly expanded shop floor space for ADANAC and storage capacity for AIV UK," says Frank Jimenez, Managing Director. "The European Market has been instrumental in AIV's success over the past decade. Now that both companies will be in one facility, our customers will experience an even higher level of service to their time sensitive needs."

Founded in Houston in 1991, AIV now boasts ten global locations across the U.S., Canada, the United Kingdom, Dubai, and Singapore, with more than \$100 million in inventory worldwide. AIV caters to the oil and gas, power generation, chemical, petrochemical, refining, pulp and paper, and water treatment industries with a commitment to a unique business model of selling to supply houses only. More information on our locations, brands and capabilities can be found on our website: [www.aivinc.com](http://www.aivinc.com).

Founded in 1986, Adanac offers a comprehensive and reliable source for modifying, testing, and supplying quality modified valves and services, focusing on industry-leading delivery solutions. Our experience and knowledge of the needs of the valve industry across the customer supply chain are extensive and comprehensive. More information on the company's successes, services provided, management, and history is available on the website: [www.adanac.co.uk](http://www.adanac.co.uk).
