

Press Release

For Immediate Release:

AIV Announces New Consolidated Facilities for AIV UK and ADANAC

Woolpit, Suffolk UK (19 June, 2025) - AIV L.P. and ADANAC Valve Specialities are proud to announce the opening of their new state-of-the-art facility in the United Kingdom. Both AIV UK and ADANAC will now operate under one roof. This strategic consolidation between a leading master distributor and a custom valve modification facility represents a significant milestone for the company. The move will substantially benefit customers, suppliers, and employees in the UK and international markets.

The new, purpose-built facility, spanning 50,000 square feet, will house a comprehensive range of products, including ball, gate, globe, check, butterfly, and swing check valves, all readily available for shipment throughout the UK, Europe and to international markets. Additionally, ADANAC has transferred all its machinery, specialist testing and operations to the new location, ensuring continued quality in custom valve modifications.

"This move reinforces our commitment to delivering high-quality valve distribution and customised valve solutions with even greater efficiency," said Frank Jimenez (UK Managing Director). "By consolidating both operations under one roof, we're able to maintain our high standards in valve services such as cryogenic conversions, precision machining, welding, bellow seals, heating jackets, and more."

"The new joint facility has allowed us to enhance both the AIV stock range and ADANAC's capabilities, whilst improving lead times," said Mark Shipp (Outside Sales Manager). "We would encourage anyone to pick up the phone or come in and see us here, the facility is definitely worth a visit."

About AIV

Founded in Houston in 1991, AIV now boasts ten global locations across the U.S., Canada, the UK, Dubai, and Singapore, with more than \$100 million in inventory worldwide. AIV caters to the oil and gas, power generation, chemical, petrochemical, refining, pulp and paper, and water treatment industries with a commitment to a unique business model of selling to supply houses only.
